Testing of the bio-feedback results performed by Kasia Zamarska, Natural Health Practitioner, Electro Physiological Bio-Feedback Specialist, Integrative Energetic Medicine. Using the Electro Physiological Bio-Feedback (EPFX) Device, The EPFX device uses Voltage, Amperage and Resistance to measure many quantum states of the body.

EPFX-SCIO Biofeedback Device was created by Professor Bill Nelson of Hungary over a period of many years of research and development to combine holistic medicine with advanced quantum technology.

The EPFX-SCIO scans the body for 15000 frequencies, each associated with a different compound, much as anti-virus software would do for a computer. The EPFX-SCIO operates at biological speeds (up to 1/1000 of a second) charting the resonance or response of the body to these frequencies, comparing them to a norm and ranking them in degree of reactivity, identifying both acute and chronic imbalances.
